Educational tours to France for schools

Learn  
French  
while having  
fun!

French workshops : practical, fun  
and communicative !

Teaching you French you can use in all kinds of situations: that is FIL's aim.

During the stay, the students will be practising French lessons at their own pace in small groups with our native French speaking FIL teachers. These learning sessions are very creative: interviews, role-playing games, radio or video reporting, etc.

The best way to improve speaking French and to gain confidence!

With the FIL method, the participants learn from them and receive constant guidance to have plenty of opportunities to express themselves in French and understand so much more!

We follow each participant individually and give support with language — or personal matters. Back home FIL provides a certificate in French language and a progress report following the CEFR — Common European Framework of Reference for Languages.

FIL :  
A unique learning experience !
